

Recombinant Marburg virus VP40 matrix Protein (MARV VP40)

Catalog #: 0568-001

Description:

Recombinant, tag-free, purified Marburg virus (MARV) matrix protein (VP40) is expressed in *E. coli* and the recombinant protein is purified using FPLC.

Formulation & Storage: Supplied in HEPES buffer (pH 7.5) containing sodium chloride, 5% glycerol and 0.1% Triton-X. **Store at -80°C.**

Notes & Usage Guidelines:

ELISA: Assay-dependent dilution

WB: Assay-dependent dilution

Applications

SDS-PAGE and Western Blot Data:

(A) SDS-PAGE and stain demonstrating 1 µg and 5 µg (Lanes 1 and 2) of MARV VP40 protein under denaturing and reducing conditions. MW denotes Novex® Sharp pre-stained protein markers. (B) Western blot detection of MARV VP40 at 500 ng, 100 ng, and 50 ng (Lanes 1-3). MARV VP40 was detected using IBT's polyclonal antibody at 100 ng/mL (Catalog # 0303-001) and anti-rabbit IgG-HRP conjugate, followed by TMB membrane substrate.

ELISA Data:

Plate was coated with MARV VP40 starting at 800 ng/well, serially diluted in DPBS. Washed plate was detected using one dilution of a positive control serum, followed with anti-IgG HRP conjugate and TMB substrate. OD650 is reported below.

MARV VP40 ng/well	OD 650 nm
800.00	3.391
400.00	3.459
200.00	3.428
100.00	3.392
50.00	3.149
25.00	2.894
12.50	2.470
6.25	1.942
3.13	1.390
1.56	0.731
0.78	0.365
0.39	0.198

Certificate of analysis:

A hardcopy of datasheet is sent along with the products. Please refer to it for detailed information. For older lots, refer to the applicable certificate of analysis that may be requested at services@ibtbioservices.com

Related Products:

IBT provides a wide array of anti-filovirus specific antibodies, recombinant proteins, and other infectious disease reagents. Please see our website, www.ibtbioservices.com for more details.

Intended for research use only, not for human, therapeutic, or diagnostic applications.
