Applications

Western Blot Data:

SARS-CoV-2 Spike protein at 25, 50, 100 and 200 ng (lanes 1-4) and RBD protein at 25, 50, 100 and 200 ng (lanes 5-8) tested under reduced condition, were detected using rabbit pAb at 500 ng/mL and visualized using an anti-rabbit IgGHRP conjugate and TMB membrane substrate.

ELISA Data:

Spike and RBD proteins were diluted to 1.5 µg/mL in PBS for plate coating. Rabbit pAb was serially diluted semi-log and incubated on the coated plates. Washed plates were detected with anti-rabbit IgG-HRP conjugate and TMB substrate. OD650 is reported below.
