

Recombinant Human Transferrin - Holo

Catalog #: 0591-PP-001

Description:

Recombinant, Human Transferrin – Holo expressed in the *Thermothelomyces heterothallica* system. This protein is produced using proprietary fungal expression technology with a molecular weight of ~75 kDA with a purity of >90% by SDS page. It is explicitly optimized for use as a cell culture media supplement, for protein stabilization, or as a diagnostic reagent.

Formulation & Storage: Supplied as lyophilized powder. Soluble in water or PBS buffer. Store at -20°C up to 1 year, and at -20°C for 1 month after reconstitution.

Product Reconstitution Info :

Add pure water to obtain a protein concentration of 10–30 g/L. If further dilution is required, prepare the diluted protein using an appropriate buffer—such as 20 mM sodium phosphate (pH 6.5–7.8) containing up to 300 mM NaCl.

Applications

SDS-PAGE and Western Blot Data:

HPLC Data:

UV chromatogram at 280 nm demonstrating a highly homogeneous protein profile with the primary target peak accounting for 90.84% of total area.

	Name	Retention	Area	% Area
1		0.360	8706	1.43
2	Transferrin	1.507	551804	90.84
3		1.656	19236	3.17
4		1.813	16908	2.78
5		1.958	10766	1.77

Certificate of analysis:

A hardcopy of datasheet is sent along with the products. Please refer to it for detailed information. For older lots, refer to the applicable certificate of analysis that may be requested at services@ibtbioservices.com
