

Recombinant Bovine FGF

Catalog #: 0596-PP-001

Description:

Recombinant Bovine FGF is a lyophilized growth factor produced in *Thermothelomyces heterothallica*, offering high-purity, low-endotoxin activity to promote fibroblast proliferation for cell culture and life science research applications.

Formulation & Storage: Lyophilized (freeze-dried) powder

Store at -20°C

Notes & Usage Guidelines:

Molecular weight: ~17 kDa

Purity: >95% by SDS-PAGE

Storage after reconstitution: >1 month at -20°C

Shelf Life: ~2 years (lyophilized)

Deactivation: 75 °C for 20 minutes

Endotoxin: <0.1 EU/μg

Applications

- Cell culture media supplement
- life science research

SDS-PAGE: Criterion™ TGX Stain-Free™ Precast Gels, 4-20%.

15 μl load → 4.875 μg loaded into the well.

Certificate of analysis:

A hardcopy of datasheet is sent along with the products. Please refer to it for detailed information. For older lots, refer to the applicable certificate of analysis that may be requested at services@ibtbioservices.com

Related Products:

IBT provides a wide array of anti-filovirus specific antibodies, recombinant proteins, and other infectious disease reagents. Please see our website, www.ibtbioservices.com for more details.

Intended for research use only, not for human, therapeutic, or diagnostic applications.
